ANALYTICA CHIMICA ACTA, VOL. 241 (1990)

AUTHOR INDEX

Abbink Spaink, H.
—, Lub, T.T. and Smit, H.C.
Improvement of the performance of a diode-laser spectrometer by using sweep averaging and numerical data processing 83
—, Lub, T.T. and Smit, H.C.
Computer-controlled temperature sweeping as a scanning technique for tunable diode lasers. Application to measurements at atmospheric pressure 95
Allmaier, G.M.
—, see Juvet, R.S. 241
—, Schmid, E.R., Hagspiel, K., Kubicek, C.P., Karas, M. and Hillenkamp, F.
Strategy for the characterization of the glycoprotein endoglucanase I isolated from *Trichoderma reesei*: combination of plasma desorption and UV laser desorption time-of-flight mass spectrometry 321
Alonso, J., see Del Valle, M. 31

Bachas, L.G., see Freeman, M.K. 119
Bahr, U., see Karas, M. 175
Bartroli, J., see Del Valle, M. 31
Bauer, T., see Sturm, G. 261
Bélanger, J.M.R., see Paré, J.R.J. 227
Bennekom, W.P. Van, see Gerritsen, M.J.P. 23
Bjarnason, A., see Lam, Z. 187
Borie, G., see Fournier, F. 265

Cano Pavón, J.M., see Gallardo Melgarejo, A. 153
Chabala, J.M., see Lodding, A.R. 299
Chapoteau, E., see Czech, B.P. 127
Comisarow, M.B., see Lam, Z. 187
Cowan, J.A., see Naylor, S. 281
Czech, B.P.
—, Chapoteau, E., Zazulak, W., Gebauer, C.R. and Kumar, A.
Chromogenic cryptahemispheraplexes for the determination of potassium in aqueous solutions 127

Dallinga, J.W., see Tip, L. 219
De Alwis, W.U., see Wimalasena, R.L. 105
Debrauwer, L., see Fournier, F. 265
Del Valle, M.
—, Poch, M., Alonso, J. and Bartroli, J.
Comparison of the Powell and simplex methods in the optimization of flow-injection systems. Simulation on modelled experimental surfaces and experimental optimizations 31
De Matteis, F., see Gibbs, A.H. 233
Doelling, V.W., see Tsarbopoulos, A. 315
Dutton, G.G.S., see Lam, Z. 187

Edmonds, C.G., see Loo, J.A. 167

Fan, S.
— and Fang, Z.
Compensation of calibration graph curvature and interference in flow-injection spectrophotometry using gradient ratio calibration 15
Fang, Z., see Fan, S. 15
Fennessey, P.V., see Miller, L.V. 249
Fischer, P.M., see Lodding, A.R. 299
Fournier, F.
—, Salles, C., Tabet, J.C., Debrauwer, L., Rao, D., Paris, A. and Borie, G.
Tandem mass spectrometric investigation on 17β-estradiol palmitate in negative ion chemical ionization 265
Frater, Y., see Gibbs, A.H. 233
Freeman, M.K.
— and Bachas, L.G.
Fiber-optic probes for cyanide using metalloporphyrins and a corrin 119

Gács, I.
— and Payer, K.
Determination of nanoequivalent amounts of organic halogens by sample combustion–flow-injection conductimetry with on-line preconcentration 71
Gallardo Melgarejo, A.
—, Cano Pavón, J.M. and Ríos Castro, A.
Flow-injection–diode array detection: a hybrid approach to the automation of simultaneous determinations of metal ions with chromogenic reagents 153
Gao, Z.
—, Li, P., Wang, G. and Zhao, Z.
Preconcentration and differential-pulse voltammetric determination of iron(II) with Nafion–1,10-phenanthroline-modified carbon paste electrodes 137
— and Zhao, Z.
Single-sweep polarographic determination of nitrite in cobalt(II)–thiocyanate medium 161
Gebauer, C.R., see Czech, B.P. 127
Gerritsen, M.J.P.
—, Kateman, G., Van Opstal, M.A.J., Van Bennekom, W.P. and Vandeginste, B.G.M.
Flow-injection system with photodiode array detection and

multivariate data evaluation for quantifying teniposide in blood plasma 23
Gibbs, A.H.
—, Naylor, S., Lamb, J.H., Frater, Y. and De Matteis, F. Copper-induced dealkylation studies of biologically *N*-alkylated porphyrins by fast atom bombardment mass spectrometry 233
Gillet, G., see Vajta, S. 209

Hagspiel, K., see Allmaier, G.M. 321
Hambidge, K.M., see Miller, L.V. 249
Heerma, W., see Tip, L. 219
Henrion, G., see Henrion, R. 147
Henrion, R.
—, Rassmann, U. and Henrion, G. Chemometric analysis of the behaviour of trace element concentrations in tungsten wire production 147
Hillenkamp, F., see Allmaier, G.M. 321
—, see Karas, M. 175
Hunter, C.A., see Naylor, S. 281

Ingendoh, A., see Karas, M. 175
Inoue, Y.
